How to use Cellica Database Client on Windows OS? (Personal/Enterprise Edition)?

## Product(s)

Cellica Database (Wi-Fi, Internet and Anywhere) Personal Edition or Enterprise Edition

## Requirement

- Use Cellica Database client application on PC (Windows OS).

## Solution:

### 1) Using Cellica Database client application on Windows OS 8.1 or later.

We have Windows Clients for Windows 8 and Windows 10 , which you can download from Windows Store from the following link:

#### Cellica Database Anywhere:

<https://www.microsoft.com/en-us/store/apps/cellica-db-anywhere/9nblggh0fkwb>

#### Cellica Database WiFi:

<http://apps.microsoft.com/windows/en-in/app/990a4fd1-e645-491f-93dc-cfc0676c7cfc>

### 2) Using Cellica Database client application on Windows OS 7

You can use “Amiduos” Android Emulator on Windows 7 or later PC, to run Cellica Database Android Clients.

Download and install amiduos simulator from following link on your PC.

**Web Link** of amiduos OS: <http://www.amiduos.com/>

**Price** US\$15

After installation of the simulator, install the Google Apps and Services by using the steps given on following link. Now you can directly install the Cellica Database application from “Google Playstore” on the simulator.

<http://amiduos.com/support/knowledge-base/article/installing-google-apps>

Add this simulator in User Manager module of Cellica Database Server on your PC. Assign profiles and forms to this user and sync from Cellica Database application on the simulator to load the profiles and forms.
